

Test Training Class for Amateur Radio License

Our club is offering a FREE Training class to help you get started in Amateur Radio with your Technician Class License. You don't need to know anything about Electronics or Radio Stuff. This is a down to earth class for those that want their license, but don't know how to get started. It's 2 Saturdays of apx 5 hours long in the class, and a hour off for lunch. You are asked to read the questions and answers about ½ hour daily. A test is available on the 3rd Thursday before our regular club meeting starting a 6pm. That's just 13 days of prep from Start to taking your Test. This is the way to get your License. No age limits! I've seen 9 years old get it. No More Code either.

What I ask you to do is bring a laptop or note book that can take a flash drive or CD for the material to read in class. You must have Adodie Reader to open the files. You will also need a Powersupply to keep your device powered up in class. If all you have is a desk top, I'll project the material on the wall so you can read it and let you take a CD home with you. If you can bring a spare blank CD DVD RWDVD that I can load the info on to it. The CD's are my only expense for the class.

I only give the class 4 times a year. Once a Quarter.

Here are the Dates for 2020

February 1st and 8th test on 13th

May 2nd and 9th test on 14th

August 1st and 8th test on 13th

November 7th and 14th test on 19th

If there is an interest, I can offer a Class Study for your GENERAL Class License exam. This will follow the Technician classes in November. It only takes ONE who wants to get there General, but I need to know.

The Location for the classes is at the Tulare County Board Of Supervisors Chambers, 2800 W Burrell, Visalia Calif. Time of class is 10am to 4pm Saturday.

I will be your Facilitator for this endeavor

My name is

Larry Taylor KF6JBG

Please call me and let me know you are coming. (559) 786-7033

Thank You and Good Luck
